

## Food grade silicone O-ring silicone gasket

Material: silicone, rubber

It is mainly used in automobile doors, bodies, windows, sunroofs, seats, chassis, rear trunks and other places; it plays an important role in sealing, sound insulation, waterproof, dustproof, shock absorption, energy saving and other aspects of automobiles. The special material of the sealing ring makes it have excellent elasticity and compression resistance, not easy to deform, anti-aging, ozone resistance, etc., it can work in high and low temperature environments, and the working temperature can be between  $-40^{\circ}\text{C}$  and  $120^{\circ}\text{C}$ . The most important role of automobile silicone seal ring is to provide better performance for automobile seal.

**Suzhou Sifei Silicone Rubber Products Co., Ltd.**
